

Disinfecting

3-6 Year olds

Srimayee Gadde

Overview

This lesson is an overview of ways to get sanitized during the Covid-19 pandemic. It is very important to keep your surroundings and your body clean. This is especially important for kids who aren't aware of being sanitized. This activity will help them learn ways to disinfect objects and keep clean.

Materials Needed

- Disinfectant Wipes
- Toys
- Books
- Paper towels
- Soap
- Gloves

Steps

1. First let the kids put on some gloves.
2. Then give them one disinfectant wipe. And let them start cleaning a toy or a book.
3. Ask them to clean the objects thoroughly, as this will help disinfect the object completely.
4. After the cleaning is done, lay down a few paper towels and then tell them to put the toys on the paper towels to let them dry.
5. For the books let them dry the book with a paper towel.
6. Lastly, let them take of their gloves and instruct them to wash their hands thoroughly with soap.

Terminology Associated with the Lesson

Germs - a microorganism, especially one which causes disease

Disinfectant - a type of chemical liquid that will get rid germs.

Notes To Instructor

Allowing your children to take an initiative to clean their objects would really help them inculcate the habit of keeping clean and staying hygienic!
